IN THIS ISSUE:

- PERFECT GUIDE RELATIONSHIPS
- ANNUAL TRADITION: THE BUCKET LIST
- PRIME TIME AT WORLD CLASS FLY FISHING DESTINATIONS
- DECEMBER MEMORY PHOTO
- WISHES FOR 2016

We are in the ninth year of publishing our monthly newsletter with updates on the great fly fishing venues, trip reports and insights for our traveling fly fishers. We've been to most locations and pride ourselves on our ability to research new destinations. Whatever unbiased information on timing and locations we can provide comes at the same cost to you as booking direct – i.e., NO EXTRA COST.

PERFECT GUIDE RELATIONSHIPS

How do you evaluate the value of a guide you really enjoy fishing with? The “right guide” makes all the difference in your enjoyment of a day on the water, regardless of how successful the fishing may be on that particular day. I rate the value of the “right guide” on the same plane as having an angling partner you like sharing your fishing time with.

What do you value in evaluating a guide? I'm sure there are variations in what different anglers consider important, but there are some basics:

- friendship – someone you enjoy spending time with when pursuing fish.
- trust – you respect their advice and opinions regarding being successful in that particular fishing venue.
- ability to laugh together at the frequent mistakes that are a part of each fly fishing pursuit. This includes your blown casts as well as the occasional guide error when the “fish” he spotted turns out to be a “wish fish” or a “rock fish.”

When you find a guide that meets your criteria, you've found a relationship worth cultivating. It is a relationship you should nurture and build on for the future. It is those relationships that ensure the time and money you spend on pursuing your fly fishing passion returns the greatest possible rewards.

ANNUAL TRADITION – THE BUCKET LIST

Each year in our December newsletter, it has been our tradition to publish a list of most of the world's great fly fishing areas with the prime times to visit those destinations. This newsletter carries on that tradition. We've added some new destinations and updated the “prime times” in a few cases.....here it is: *THE BUCKET LIST*.

PRIME TIMES AT A VARIETY OF WORLD CLASS FLY FISHING DESTINATIONS

Annually, our year end newsletter (in this case, our “year beginning”) is primarily devoted to answering the questions we are most commonly asked about the best time to visit this destination or that destination. This list is updated from information gathered personally and through our traveling fly fishers during 2014. Listed chronologically, and all in one place, are the general answers we provide. Here is the BUCKET LIST and the best times to fish! None of this information should be considered infallible as weather patterns, water levels, and hatch cycles are never exact – but these timeframes will give you a sense for the best odds of “hitting it right.”

We are a small, personal service oriented, fly fishing travel consultant and are not concerned with booking shoulder seasons – we want our clients fishing the best waters at the best possible time. We don't have a need to fill an entire calendar for 1000's of clients, just those that we work with on a regular basis in finding the perfect destination to satisfy their fly fishing dreams and stimulate the possibilities for the future.

JANUARY – MARCH

Trout: This is the heart of the summer in southern hemisphere destinations such as Argentina, Chile, and New Zealand. Late January through February usually provides the best dry fly fishing, but it's good all through this timeframe into the brown trout spawning cycle which begins during March into April. These months would be best also for the giant sea run brown trout of Tierra del Fuego in southern Argentina.

Amazon – Peacock Bass: Water level is critical for the Peacock Bass (below, left). In the only “fly fishing only” watershed in the Amazon, the season gets started in November, but the most stable low water levels usually occur in the first quarter of the year.

Christmas Island, South Pacific: The fishery for bonefish, Giant Trevally, and Bluefin Trevally (at right) is relatively stable year round since C.I. is on the equator. However, some veterans prefer to avoid the winter months when the winds tend to be stronger.

Golden Dorado: The prime northern Argentina Golden Dorado (below, right) fisheries fish well during the early part of the year. There are some of the newly discovered dorado fisheries, such as Bolivia, that this timing does not apply to, but this would be a good time to visit the established fisheries in northern Argentina. The timing is such that Golden Dorado can be combined with a Jurassic Lake and Patagonia visit – even the Amazon.

Jurassic Lake, Argentina: Prime time to find the giant rainbows (right) of Jurassic Lake (at right) in the only tributary stream, the Barrancoso River, during their spawning mode is the first two weeks of January and late March – early April.

The “New Jurassic” – Kooi Noom: In the same general area of Argentina as the original Jurassic, Kooi Noom has similar giant rainbows in miles of streams and rivers, in addition to the still water fishing,

Seychelles: This is the middle of the season for trevally, bonefish, milkfish (below, right-center), etc at the truly world class Alphonse Island in the Seychelles. Season will conclude in April.

Tropical Flats Fisheries – Western Hemisphere: Occasional weather fronts can put a damper on the fishing in places like Belize and Ascension Bay. Fishing can be good in the early part of the year if you avoid those cold fronts. Generally, the weather, under any conditions, is a lot warmer than our cold, gray USA skies. February and March have provided many great permit (below, left-center) trips in Belize.

APRIL - JUNE

Trout: April can provide good conditions before the runoff begins on some western Rocky Mountain waters, but weather can be an issue – difficult to plan far in advance. Tailwaters, such as the San Juan, will be the most stable. Runoff is less of a factor as we get into late June, but most waters in the Rockies (both USA and Canada) are going to fish better as we move into July.

Tropical Flats Fisheries: April, May, and June are usually “prime” for tropical salt water flats fisheries in the western hemisphere. Migrating tarpon (below, right), in places like Belize, are on the move and beefing up the numbers of the resident fish. By June, even though fishing can be excellent, most land based lodges will have biting bugs in sufficient numbers to carry you away.

Cuba: Now that US citizens can access Cuba, the many different Cuban fly fishing operations are in their prime. The seasonal aspects of the fishing here are very similar to Ascension Bay and Belize with migrating tarpon showing in April through July.

Mongolia - Taiman: May, June, and early July are some of the top times to pursue the giant Taiman (below, left) of Mongolia.....also late August into September.

Minipi River – Brook Trout: If the spring is a little early, the giant brookies of the Minipi River in Labrador are on the move in late June sipping hatching caddis and mayflies from the surface.

Alaska: June is the early season – salmon not yet in the rivers. Rainbows chasing salmon smolt as they migrate to the ocean – some good dry fly fishing in selected spots.

Belize – Tarpon: Beginning in late April and May and extending through July, migrating tarpon begin to show and the numbers of large tarpon present in the coastal waters of Belize increase dramatically.

Atlantic Salmon: Begin to arrive in many rivers around the globe. The Ponoï in Russia has numbers of Atlantics (below, center) in May. Many of Canada’s top waters, like the Gaspé region, have the largest fish entering in June even though water conditions usually are not yet ideal.

JULY - SEPTEMBER

Trout: In the Canadian and US Rocky Mountain states, the runoff is winding down in late June and through mid July, depending on the location. The best hatches of the season usually begin as the waters clear and drop. Montana, Idaho, British Columbia and the American west is at its best in July. August brings the hopper season and September sees the beginning of the fall hatches. The second week of July til mid August is usually the best time for sight fishing the large Bull Trout (below, left) in the Fernie BC area.

Tropical Flat’s Fisheries: The fishing can be outstanding, the weather is hot and humid and, for land based lodges, the bugs can be a bother. Most land based lodges close during this time. However, for air conditioned mothership operations in places like Belize, exciting results are available and, generally, you’ll have the waters to yourself.

Minipi River – Brook Trout: The first three weeks of July is the absolute prime time to take 5 to 8 pound brookies (at right) on the surface on the Minipi in Labrador.

Alaska: Early July sees giant king salmon begin their runs into the rivers. Most anglers consider the prime Alaska time to begin with the run of the silvers (below, right-center), the top fly rod Pacific salmon. This usually occurs in most watersheds beginning around early to mid August. The Rainbow fishing begins to peak around this time also and continues to be strong into September.

Bolivia – Golden Dorado: Tsimane Lodge in Bolivia offers Golden Dorado in mountain streams and large and small river environments where sight fishing is possible. Season differs greatly from the Argentina Golden fisheries beginning in late June and extending into the early fall.

Kamchatka: About mid July, the dry fly activity begins in earnest on some rivers. Different watersheds have the prime times (depending on the individual definition of “prime”) in slightly different times during the next 6 weeks.

B.C. Steelhead Waters: The lower stretches of the Dean River begin to host their famous summer run peaking the last two weeks of July and into early August. For the majority of the great steelhead (below, right) rivers, look to early to mid September through October for the runs of fresh fish to be in full force.

Canada – northern waters: Northern Pike (below, left-center), grayling, and lake trout in the northern Canadian waters are at their best soon after ice-out. Late June and into July are prime.

OCTOBER – DECEMBER

Trout: Weather begins to become an issue as we get into the fall in the American west; however, there are some waters that provide a good October opportunity.

New Zealand: The “early season” in New Zealand is the fourth quarter with November and December providing some of this country's famous stalking experiences for large rainbows and browns (below, center). The upsides are unpressured fish and few anglers to pursue them; the downside is the weather can be more unsettled during their spring than their summer.

Tropical Flats Fisheries: October can be a month of settled weather in the tropical climates for bonefish, tarpon, and permit,.

Belize - Snook: the spawning season of November, December, and January provide the greatest numbers of snook (below left) in Belize.

Jurassic Lake: In Argentina, November begins the runs of giant rainbows into the only stream flowing into Jurassic Lake , the Barrancoso River. November and December can actually have times with too many fish in the river and waters can be high. Prime times are a little later. The lake fishes well throughout the season.

Tigerfish, Africa: The Lower Zambezi River National Park provides a protected tiger fish (below, right) fishery that many believe to be Africa’s best. If you measure both quantity of fish and the opportunities for large tiger fish, it passes all the tests. October is the end of the dry season. Waters are at their lowest and clearest – great conditions for game viewing (safari style) because the animals are congregated around the river as the water holes and smaller rivers have dried up. Plus, tiger fishing is at its best at the same time – an exciting dual purpose destination.

Seychelles: October sees the opening of the season at Alphonse Island. No anglers have been on the flats for several months and the Giant Trevally (below, right-center) are eager and aggressive eaters.

Redfish: The shallow flats of the Lower Laguna Madre estuary system in Texas and the coastal Gulf waters, provide their best sight casting for redfish (below, left-center) in October and into early November. Much of this water is shallow making stalking these brutes a visual experience.

AFRICA – DECEMBER MEMORY PHOTOS

Africa presents some of the most outstanding photo opps on the planet, even without fish! Lucky and Russ Leavitt are returning to Africa in 2016 to visit Victoria Falls and the Lower Zambezi National Park to collect a few great tiger fish photos (tigerfish = serious teeth, see above right). From their most recent trip, they submitted a few of their favorite photos.....special leopard shot - it's in the eyes!!

WISHES FOR 2016

Marte and I hope your holidays are everything you want them to be and you get to spend them with the people most important in your life. For 2016, hope you get to knock a few items off your personal bucket list. For me, the year will begin very fast with a mid January trip to Belize – our third exploratory trip into northern Chetmal Bay in Belize on the mothership Meca in the last four years. In early February, we leave for our annual three

weeks in New Zealand followed by a return visit to the Ningaloo Reef in the Northwest corner of Australia. Should be fun and hopefully provide some decent photos for next years newsletters.

PHOTO CREDITS: (top to bottom): bluefin trevally – Loren Irving; peacock – Annie Kubicka; permit – Art Hinckley; milkfish – Rich Cheatham; dorado – Mark Cowan; taiman – Jerry Saltzgaber and Chip Fudge; tarpon – Todd Roebken; brookie – Jeff Reinke; steelhead – Lance Ruffel; northern – Jim Hine; silver – Henry Gans; snook – Steve Mitchell; redfish - Barbara Klutinis; brown – Paul Wilms.
