

BULL TROUT - FERNIE

From Josh Luftglidden on the Wigwam River, a tributary of the Elk River near Fernie:

“The Bull Trout did not disappoint and the fishing was red hot all day.... I landed something like 15-20 monster Bull Trout. The average fish being around 28”, with the two largest fish coming in at 34”-35”. The fishing was so hot at one point that I was hooking a fish every 2-3 casts! The last fish of the day proved to be the biggest and hardest to net. He took off downstream as soon as he was hooked, and at one point he had me 100+ yards into my backing. We finally netted him almost a full mile from where he was hooked!”
